

GO-LIVE SIGNUP GUIDE

Every account and sign-up needed before the app goes live - step by step, in the order to do them. Island Junk Solutions Ltd. - Victoria, BC.

The one thing to know: only ONE of these has a waiting period - Twilio's text-message verification, which takes **2-3 weeks** to approve. Everything else is same-day. So do Section 1 first, submit the verification, and knock out the rest while you wait.

START TODAY: Section 1 (Twilio). The verification review is the long pole. Submit it, then the clock runs in the background while you do everything else.

Gather these before you start (10 minutes)

- [] **1.** Your **BC incorporation number** and/or **CRA Business Number (BN)** for Island Junk Solutions Ltd. - it's on your incorporation papers or any CRA letter. Twilio requires it for corporations.
- [] **2.** Login for whoever manages **islandjunk.com** (you'll add two small pages: Privacy Policy and Terms).
- [] **3.** Access to your **domain DNS** (where islandjunk.com is registered) - needed later for the app's web address.
- [] **4.** Your **Google account** - the one that owns the ISLAND JUNK VICTORIA calendar.
- [] **5.** Your **Dropbox login** (the existing business account).
- [] **6.** Your **Clover login** - only to plan the move of cards-on-file to Square.
- [] **7.** A credit card for the Twilio account (it bills in USD, a few dollars a month).

Master checklist

	What	Where	Waiting?
[]	1. Twilio account + toll-free number + verification	twilio.com	2-3 weeks - DO FIRST
[]	2. Privacy Policy + Terms + SMS consent wording on the website	islandjunk.com	none
[]	3. Square account (replaces Clover)	squareup.com/ca	1-2 days verify
[]	4. Google Cloud project + Calendar API + TEST calendar	console.cloud.google.com	none
[]	5. Dropbox app (for auto-filing job photos)	dropbox.com/developers	none
[]	6. QuickBooks - nothing to sign up (already yours)	-	none
[]	7. Home for the app: hosting + app.islandjunk.com	render.com	none

*What you do **NOT** need: app-store accounts (it's a web app), a new QuickBooks signup, or any change to CallRail or your ad accounts.*

SECTION 1 - Twilio (customer text messages)

This powers the booking confirmations, "on our way" texts, reminders, and completion texts. Canadian and US carriers block business texting from unverified numbers, so the number has to pass a one-time, free **Toll-Free Verification** review. Approval typically takes **2-3 weeks** - texts are blocked until it clears, which is why this is Section 1.

A. Create the account and buy the number (about 30 minutes)

- [] **1.** Go to **twilio.com**, sign up with victoria@islandjunk.com, verify your email and cell.
- [] **2. Upgrade out of trial:** add the credit card and load \$20. Trial accounts can't submit verification.
- [] **3.** In the Console go to **Phone Numbers - Buy a Number**. Check **Toll-free** and **SMS**, country **Canada or US** (toll-free 8xx numbers cover both). Buy one (about \$2-3 USD/month).
- [] **4.** Write the number down - it goes on the website consent wording in Section 2.

B. Fill in the business profile (about 20 minutes)

- [] **5.** In the Console, open **Trust Hub** and create the **Primary Customer Profile** (also called the Business Profile). Business identity: **direct customer** (you're texting your own customers, not reselling).
- [] **6.** Enter it exactly as registered: legal name **Island Junk Solutions Ltd.**, address **3418 Pattison Way, Victoria, BC V9C 4K9**, your **BC incorporation number / CRA BN**, website **islandjunk.com**, and you as the contact.

C. Submit Toll-Free Verification (about 30 minutes - then the 2-3 week wait)

- [] **7.** Console - **Trust Hub / Toll-Free Verification** - New verification for your number. It's a form; here's what to put in each blank:

Use case: Customer care / account notifications. **Use-case description:** "Junk removal and bin rental company sending booking confirmations, crew arrival notices, appointment reminders, and payment instructions to customers who booked service and gave their number."

Monthly volume: pick **1,000**. **Opt-in type:** verbal + website. **Opt-in description:** "Customers provide their mobile number when booking by phone, text, or web form and are told they'll receive booking and service texts. Web bookings include a consent notice. Every message supports STOP to opt out."

- [] **8.** Paste two **sample messages** - use these (they include the business name and STOP language reviewers look for):

Island Junk Solutions: You're booked for junk removal Tue Jul 14, 9-11am at 123 Oak St. Questions? 778-966-5865. Reply STOP to opt out.

Island Junk Solutions: Our crew is on the way, arriving in about 30 minutes. Reply STOP to opt out.

- [] **9. Privacy Policy URL and Terms URL:** the form asks for both as separate links (required on new submissions - missing links get auto-rejected). Build them in Section 2 FIRST if they don't exist yet, then submit.
- [] **10.** Submit, then check **Trust Hub - Registrations** weekly. If it's rejected, the reason is listed - fix and resubmit (most rejections are a missing link or vague opt-in wording).

Money: the verification itself is free. Ongoing: about \$2-3 USD/month for the number and roughly a penny per text. A busy month of 1,000 texts is about \$10-15 USD.

Note: 10DLC registration is a separate US-only program for regular local numbers - with a verified toll-free number you don't need it.

SECTION 2 - islandjunk.com: two pages + one line of wording

Twilio's reviewers open your website. Three small additions make the verification sail through - your web person can do all three in an hour.

- [] **1. Privacy Policy page** (islandjunk.com/privacy). Plain-English is fine: what you collect (name, phone, email, address, job photos), why (to book and complete service), that you never sell it, and this exact sentence: **"Text messaging originator opt-in data and consent will not be shared with any third parties."** - reviewers look for it.
- [] **2. Terms page** (islandjunk.com/terms) with an SMS section: program name (Island Junk Solutions service texts), what's sent (booking confirmations, arrival notices, reminders, payment instructions), frequency (per booking), "message and data rates may apply," reply **STOP** to cancel and **HELP** for help, and support contact 778-966-5865 / victoria@islandjunk.com.
- [] **3. Consent line** next to the phone field on any booking/contact form:

By providing your mobile number you agree to receive booking and service text messages from Island Junk Solutions. Msg and data rates may apply. Reply STOP to opt out. See our Privacy Policy and Terms.

Keep the two page links in the site footer so they're easy for the reviewer to find.

SECTION 3 - Square (payments, replacing Clover)

Square is the payment rail: payment links in completion texts, cards on file for the residential-bin 48-hour rule, and the card reader if you want one. Signup is free; you pay per transaction only.

- [] **1.** Go to **squareup.com/ca** - Sign up. Business type: junk removal / waste services. Enter the Ltd.'s legal details.
- [] **2.** Verify your identity when prompted (standard for Canadian payment accounts) and **link the business bank account** for deposits. Verification usually clears in 1-2 days.
- [] **3.** In the Square Dashboard, try **Payment Links**: create one for a test amount, open it on your phone. This is what completion texts will link to.
- [] **4. Cards on file**: saved cards can NOT be exported from Clover (card-security rules). Plan a re-consent pass - as each bin customer books, their card gets saved fresh in Square. Keep Clover active until the regulars have moved over, then cancel it.
- [] **5.** Later, during the production build: Square Dashboard - **Developer** - create an application to get the API keys the app will use. Nothing to do today beyond knowing where it lives.

Fees (Canada, check current rates at signup): roughly 2.65% tapped/inserted, 2.9% + 30 cents for payment links, 3.4% + 15 cents for card-on-file charges. Your 2.4% customer card fee stays your policy on top.

SECTION 4 - Google Cloud + the TEST calendar

This gives the app permission to talk to Google Calendar. Free at your usage. One iron rule: **the live ISLAND JUNK VICTORIA and JOBS 2 calendars stay read-only until go-live**. All calendar writing during the build happens on a throwaway TEST calendar.

- [] 1. Go to **console.cloud.google.com**, sign in with the Google account that owns the dispatch calendar.
- [] 2. Top bar - project dropdown - **New project** - name it **island-junk-app**.
- [] 3. Left menu - **APIs and Services - Library** - search **Google Calendar API** - Enable.
- [] 4. **APIs and Services - OAuth consent screen**: if islandjunk.com email is Google Workspace, choose **Internal** (simplest). Otherwise **External**, fill the basics, and add yourself as a test user. App name: Island Junk App.
- [] 5. **APIs and Services - Credentials - Create credentials - OAuth client ID**, type **Web application**. Save the **Client ID** and **Client Secret** somewhere safe - the build needs them.
- [] 6. In regular **Google Calendar**: Other calendars - plus - **Create new calendar** - name it **IJ TEST - DO NOT DISPATCH**. This is the only calendar the app writes to during the build.

Never point the app at the live calendars during development. The marketing automations (Make.com revenue signal) read the live board - one stray test event could fire a false ad-conversion. TEST calendar only, until you sign off at go-live.

SECTION 5 - Dropbox app (auto-filing job photos)

Fifteen minutes, free, uses your existing business Dropbox. This creates the 'key' the app uses to file crew photos into a job folder automatically.

- [] 1. Go to **dropbox.com/developers/apps** - **Create app**.
- [] 2. Choose **Scoped access**, then **App folder** (safest - the app can only touch its own folder, which appears as Apps/Island Junk Jobs in your Dropbox). Name: **Island Junk Jobs**.
- [] 3. On the app's **Permissions** tab tick **files.content.write** and **files.content.read**, then Submit.
- [] 4. On **Settings**, note the **App key** and **App secret**. The long-lived connection token gets generated during the build - nothing more to do today.

Photos will file as Apps/Island Junk Jobs/2026/Job - Customer - Address/photo1.jpg - searchable forever, synced to your existing account.

SECTION 6 - QuickBooks: nothing to sign up

Invoicing stays manual in your hands, in the QuickBooks you already have - the app only surfaces the ready-to-invoice queue. No new account, no developer keys, nothing to do. (If we ever automate pieces later, that's a developer.intuit.com signup - explicitly not version 1.)

SECTION 7 - A home for the app: app.islandjunk.com

The production app needs a server and a database (the prototypes' phone-only storage retires at go-live). One clear recommendation: **Render.com** - managed hosting where the Claude Code build deploys straight from the code, with the database and the security certificate handled for you.

- [] **1.** Create a free account at **render.com** (sign up with victoria@islandjunk.com).
- [] **2.** Nothing else today - the actual web service (about \$7-25 USD/mo) and PostgreSQL database (about \$7-20 USD/mo) get created during the production build, sized to what the app needs.
- [] **3.** When the build asks for it: at your domain registrar, add a **CNAME** record pointing **app.islandjunk.com** at the address Render gives you. Five minutes; the build walks you through it.

Why not free hosting: the app holds customer names, phones, and job history - it needs a real database with backups, not a hobby tier.

Costs and timeline at a glance

Item	Setup time	Waiting	Ongoing cost
Twilio number + verification	1-1.5 hrs	2-3 weeks	~\$2-3 USD/mo + ~1 cent/text
Website pages + consent line	1 hr (web person)	none	\$0
Square	1 hr	1-2 days	\$0/mo - per-transaction fees
Google Cloud + TEST calendar	45 min	none	\$0
Dropbox app	15 min	none	\$0 (existing account)
QuickBooks	0	none	what you pay today
Render hosting + database	10 min today	none	~\$15-45 USD/mo at go-live

Bottom line: about **\$20-50 USD a month** all-in once live, plus pennies per text and Square's cut per card payment. The only clock is Twilio - **submit the verification this week** and everything else fits inside the wait.

When every box is ticked: tell Claude "signups are done" and the production build starts - calendar sync proven on the TEST calendar first, live board untouched until you personally flip the switch.
